

ACKNOWLEDGMENTS

The Fire and Invasive Species Workshop was sponsored by the Joint Fire Science Program, a cooperative fire science effort of the U.S. Department of Interior, Fish and Wildlife, Bureau of Indian Affairs, Bureau of Land Management, Forest Service, and U.S. Geological Survey. The Workshop was conducted as a special session of Fire Conference 2000: The First National Congress on Fire Ecology, Prevention and Management hosted by the Association for Fire Ecology, The Nature Conservancy, Tall Timbers Research Station, International Association of Wildland Fire, and the Joint Fire Science Program. We thank Neil Sugihara

for his leadership in organizing the Conference and Sandy Cooper and the University of California, Davis, University Extension for their dedication, and outstanding logistical support to ensure the success of the Workshop and Conference.

We also thank Todd Engstrom of Tall Timbers Research Station and Lee Ann Robertson of Allen Press for production schedule coordination. Special thanks are extended to Becky Jenison for help with providing graphics for logos.
